The 2020 CNSA Convention will empower you with resources as you launch your nursing career. We have designed our educational sessions to offer resources that will empower you with knowledge and tools to maximize your nursing school experience, expand your leadership skills, inform you about relevant nursing issues that are facing the profession and show you what you can do to impact your profession and patients through legislation.

Our exhibitor page has many organizations and institutions that will offer you resources on career opportunities, higher education, NCLEX preparation and study material, and more. Interact with industry partners, participate in the House of Delegates, and network with students from across California.

Nurses are at the forefront of the healthcare industry and you have the opportunity to enhance the profession by leading change and advancing health. As future Nurse Leaders, CNSA wants to empower you as you launch your nursing career.
